Personal Information

Name:	Rei Red	Gender:	???
Date of birth:	29 February 1999	Nationality:	Narnian
City:	Cair Paravel, Narnia	Status:	MSc Student

Physics student interested in computational physics, numerical simulations, and scientific data analysis.

Education

MSc in Physics — September 2025 – July 2027

University of Cair Paravel, Narnia

- Current average grade: 28.4/30.
- Relevant subjects: Quantum Mechanics, Computational Physics, Statistical Mechanics, and Advanced Mathematical Methods.
- Research interests: Particle physics, numerical modeling, and scientific computing.

BSc in Physics — September 2022 – July 2025

University of Cair Paravel, Narnia

- Final grade: 110/110.
- Bachelor's thesis: Numerical Simulation of Particle Interactions.
- Developed Python tools to process simulated data and compare numerical results with theoretical predictions.

Scientific High School Diploma — September 2017 – June 2022

Experiment House, Cair Paravel

- Final grade: 98/100.
- Strong foundation in mathematics, physics, and computer science.

Experience

Numerical Simulation of Particle Interactions — March – July 2025

Undergraduate Research Student — University of Cair Paravel

- Developed Python scripts to simulate particle interactions and investigate numerical models.
- Used NumPy and SciPy for numerical calculations and Matplotlib for data visualization.
- Compared simulation outputs with theoretical predictions and investigated numerical errors.
- Prepared technical documentation and presented the results to an academic supervisor.

Computational Physics Winter School — February 2026

Participant — University of Tashbaan

- Attended lectures on numerical methods, quantum mechanics, and scientific computing.
- Completed practical exercises involving Python-based numerical simulations.
- Collaborated with students from different academic backgrounds on computational physics problems.

rei.red@example.com +1 340 676 6767 GitHub Profile

University Physics Society — September 2024 – Present

President — University of Cair Paravel

- Coordinate a student committee responsible for academic and science communication events.
- Organize seminars and discussions with researchers and university lecturers.
- Manage event planning, communications, and collaboration with university departments.

Science Outreach Programme — October 2022 – Present

Volunteer — Cair Paravel, Narnia

- Support interactive physics demonstrations for secondary-school students.
- Explain scientific concepts through experiments and practical activities.
- Contribute to public engagement initiatives promoting STEM education.

International Experience

European Summer School in Particle Physics — May 2026

Visiting Student — CERN, Switzerland

- Attended introductory seminars on particle detectors, accelerator physics, and experimental data analysis.
- Explored the role of computational methods in modern high-energy physics.
- Participated in group discussions on current challenges in experimental and theoretical physics.

Open Science and Research Software Workshop — October 2026

Participant — Azim Balda, Calormen

- Explored reproducible research workflows and collaborative software development.
- Practiced version control using Git and GitHub.
- Discussed open-source tools and good practices for scientific research.

Competitions and Awards

National Physics Competition — March 2024

Individual Competitor

- Reached the national final after qualifying through the regional selection.
- Demonstrated problem-solving skills in mechanics, electromagnetism, and mathematical physics.

University Data Analysis Challenge — November 2025

Team Member – Second Place

- Collaborated with two students to analyze a scientific dataset.
- Developed Python scripts for data processing and visualization.
- Presented the team's methodology and conclusions to a panel of evaluators.

Technical Skills

- **Programming:** Python, C++, basic Bash scripting.
- **Scientific computing:** NumPy, SciPy, Matplotlib, Jupyter Notebook, ROOT, and PyROOT.
- **Data analysis:** Statistical analysis, numerical modeling, data visualization, and uncertainty estimation.
- **Development tools:** Git, GitHub, VS Code, Linux, and LaTeX.
- **Research:** Literature review, technical writing, scientific reporting, and reproducible computational workflows.
- **Soft skills:** Teamwork, public speaking, problem-solving, and project coordination.

Languages

- Narnian : Native
- English: C1
- German: B1
- French: A2

Additional Information

- **Research interests:** Particle physics, computational physics, numerical simulations, and scientific software.
- **Interests:** Hiking, chess, science communication, and open-source projects.
- **Email:** rei.red@example.com
- **GitHub:** github.com/reired-demo
